

CivSec Guardian X

DoD-caliber Multi-Level Security

The Next Generation in Accessible High-Security Data Management for the Civilian and Commercial Sectors

Once the exclusive domain of the highest echelons of government, the CivSec GuardianX, an advanced Multi-Level Security (MLS) system, was engineered to democratize Department of Defense (DoD)-level security. Today, businesses and non-governmental organizations can leverage the same caliber of data protection and transfer technology that the DoD relies on at a fraction of the cost and time to deployment.

CivSec Guardian X Features:

- **Rigorous Schema Validation:** Ensures every piece of data adheres to strict structural standards for integrity and compliance
- **Swift Integration with Proprietary Data Formats:** Quickly adapts to proprietary data formats for immediate deployment and utility
- **Data Transfer Capabilities:** Facilitates file-based and near-real-time data streaming, ensuring versatility in data handling
- **Multi-Level Security Domains:** Designed to operate across varied security levels, offering flexible deployment scenarios
- **Physical Network Segmentation:** Enhanced security through physically isolated network segments reduces vulnerabilities
- **Assured Data Integrity:** This guarantees that data remains true to its intended form, providing confidence in its validity
- **Adaptive Transfer Solutions:** Adapts to a wide range of data transfer requirements, from secure file exchanges to live data feeds
- **Cost-Efficiency:** Compared to other competitors, CivSec GuardianX offers advanced security features at a competitive price.
- **Beyond Compliance:** CivSec GuardianX exceeds standard / government security protocols, delivering unparalleled and secure solutions

SYSTEM SOLUTIONS GROUP

Developing Mission-Critical Hardware, Software, and Integration Solutions for the Warfighter

Bring your challenge to Odyssey's dedicated team of hardware, software, and integration professionals... an agile team backed by a robust CMMC-certified DevSecOps infrastructure bringing decades of experience designing, developing, and fielding systems at home and around the globe.

- > Requirements development and system design
- > Rapid prototyping to final, field-ready solution
- > Discipline engineering and workflow
- > Pre-build foundational components
- > Baked-in enforcement of cybersecurity / IA
- > Reduction in time and cost

OUR PORTFOLIO OF AVAILABLE FIELD-READY SOLUTIONS

ODYSSEY IS DEDICATED TO HELPING GOVERNMENT LEADERS THINK AHEAD AND ACCERATE CAPABILITY

Odyssey builds, secures and integrates capabilities and technologies to meet tomorrow's mission requirements. We enhance operational readiness through comprehensive program support. We deliver exprtise to the following disciplines:

AVIATION

CSISR

MEDICAL R&D

SPACE & MISSILE DEFENSE

SYSTEM SOLUTIONS
